

I'm writing to introduce you to an extraordinary animator, Steve Garrett. He has almost single handedly run and executed the development of our animations for Pipsquakz over the past year. He is tireless, enthusiastic, meets deadlines, and is a team player; and a joy to collaborate with. I consider animation to be Steve's strength, both 2D and 3D, but he is also very capable at design, directing, concept/story, music/sfx and editing (yes, he can be a one man band when necessary). Steve has also been key to architecting our virtual world online – and was previously a toy designer for a top toy company.

Don't let his versatility scare you. He can slot himself into virtually any part of the animation process and is an extremely fast pick up. I've copied Steve here and you may contact him directly to see links to his work.

My best,

Robert
